

Choosing Joy

Book Launch Website Concept

A three-page website designed to introduce the book, highlight the author's platform, and create an early audience connection ahead of publication.

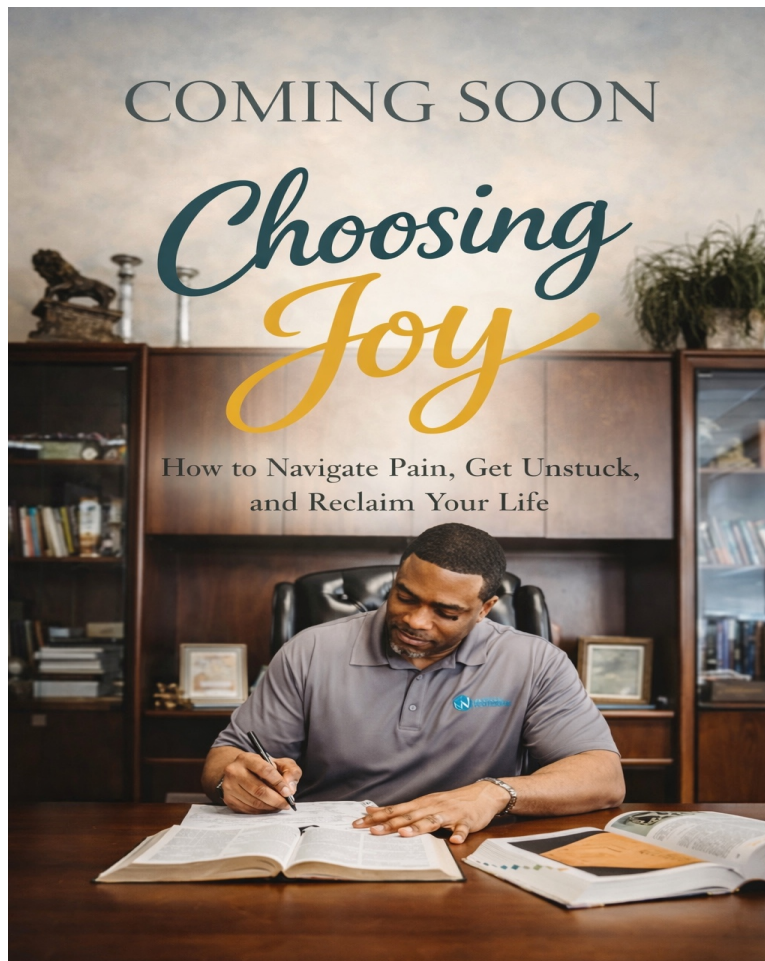

Website Structure

Page	Purpose
Home	Introduce the book, capture interest, and present the author's message.
About	Explain the story behind the book and highlight the author's background.
Contact	Allow publishers, media, and readers to connect and join the launch list.

About the Book

Choosing Joy explores how individuals can navigate pain, loss, and uncertainty without losing their sense of identity, faith, or purpose. The book combines personal insight, community experience, and spiritual reflection to guide readers toward healing and renewed direction.

Author Platform

The author's work includes mentoring, speaking engagements, and community leadership. Photography used on the website reflects these roles and positions the author as both personable and authoritative in the topic of resilience and faith-centered personal growth.

Why This Website Supports the Book Launch

The website is designed to serve as both a reader entry point and a publisher-facing platform overview. It demonstrates the book's message, showcases the author's leadership and community engagement, and builds an audience ahead of publication through launch updates and speaking inquiries.
